

Mower Caddy™

The Jacobsen Mower Caddy™ is designed with the operator in mind. This rugged and versatile trailer features a new drive-on ramp and simple latching mechanism that make it easier than ever to load walking greens mowers on and off so you can get the job done in less time.

Maximum productivity

- **Easy loading.** Simply “drive” the mower forward onto the trailer ramp and you are on your way.
- **New simple latching mechanism** has a Universal “hook” system to easily secure equipment for transport. You can quickly switch between mower models with no changes to the trailer.*

Built to last

- **Heavy-duty welded steel frame and bed** will provide a durable construction to last for years.
- **“Soft” decks** with rugged rubber matting on the trailer bed protects the rollers, traction drum and cutting units.
- **Dual position hitch** provides two attachment points for easier trailer leveling for various vehicle heights.

Safe and efficient

- **Convenient tie down loops** provide greater stability especially on hilly terrain. Added tie down points protect your investment in our legendary cutting system.
- **Increased vehicle clearance.** The extra distance between the Mower Caddy and towing vehicle creates additional clearance for tight turns allowing you to access hard to reach areas.

Multiple accessories

- **Optional accessories** include a dew whip holder, grass basket holder and spare battery mounting carrier.
- **Mower mounting kits** are available for each Jacobsen walking greens mower model.*

* Each mower requires a mounting kit which is secured by the trailer latch. Mounting kit sold separately.
